## Introduction

---

Hello, I'm Dobin,

I'm an aspiring web developer with a strong passion for front-end development and UI/UX design. Originally from South Korea, I bring a diverse background and strong multilingual skills.

I've recently completed a coding boot camp, gaining proficiency in HTML, CSS, JavaScript, Figma, and design software. I've also taken courses in project management, prototyping, and web design.

My language skills include proficiency in Japanese and Korean, and I'm currently learning Swedish.

While I don't have professional experience as a web developer yet, I'm enthusiastic and eager to apply my skills to real-world projects. I have a portfolio to showcase my work and demonstrate my dedication to web development.

Thank you for considering my application, and I'm excited about the possibility of joining your team.
